INTRODUCTION

A recent energy survey (1) of the ceramics industry in Ontario was undertaken by the Ministry of Energy.

The last such survey of the ceramics industry was published in 1978 as the "Operators List" by Energy, Mines and Resources Canada (2). Since 1978, a number of new companies have begun, a number of companies have ceased operation and a new industrial sector has emerged in the manufacturing of advanced ceramics.

One conclusion derived from the Ministry of Energy survey was that the ceramics industry is an important and growing industry in Ontario.

In order to identify the companies in the ceramics industry sector, a number of industry directories were accessed. It should be noted, however, that this publication does not represent a comprehensive listing of ceramics manufacturers. During our research it was found that firms with non-ceramic and ceramic product lines were occasionally listed under non-ceramic categories. Known new companies were not listed in the directories. Where possible, these companies were included in this publication.

The following material is a compilation of the Ontario Ceramics Industry.
